## PROJECTS

### • THERUMBAOAS – MONGODB, EXPRESSJS, REACTJS, NODEJS: [GITHUB](#) | [DEMO](#)

*Portfolio website for a photographer to showcase her creative work in photography. The website includes personal blog page, blog post control, images, and function to manage customer leads.*

- Homepage - display a gallery of raw photos of photographer's work
- Administrator Dashboard - to create, read, update, and delete (blog post), upload and delete gallery view, create leads from contacts us page
- Slick UI design and great color scheme - Front end styles in CSS with Framer-motion
- Backend design - Mongoose, Express, CORS Middleware, AXIOS/API call to communicate from client-server to database

### • D2W LOGISTICS – MONGODB, EXPRESSJS, REACTJS, NODEJS: [GITHUB](#) | [DEMO](#)

*B2B-focused application for managing offers and inquiries related to overseas container freight capacity for last-minute shipping needs.*

- The target users are the shipping or logistics companies that are looking for and/or have additional container freight capacity to be used for fulfilling overbooked shipments or unscheduled, last-minute shipping requests.
- Login /Registration authentication - Dependencies with JWT and BCrypt.
- CRUD application using MERN to create reservation capacity, view, and update
- Used EMAILJS to create Confirmation of Submitted Inquiry.
- Assigned to polished styling and User Interface using CSS3.
